

# Confluence-based Intranet

www.linchpin-intranet.com

## Linchpin – the **personal** intranet

Linchpin is a social intranet platform, that is personalizable like no other. It connects modern digital collaboration in a team to classic management requirements all in one system. There are world wide launch partners right with you. And the completely transparent costs hold so much more value than the comparable, more expensive solutions.

### Atlassian Confluence

- Real team collaboration and knowledge management
- Create content using templates with just a click
- Easily definable permission and role concepts

### Linchpin Mobile

Intranet app on every employee's smartphone.

### Linchpin Touch

Intranet with touch features without a computer workstation (for example on the factory floor or in the cafeteria).

### News

- Supports top-down and bottom-up communication
- Flexibility for individual news concepts
- Streamlined editorial process with integrated approval workflows

### Personalization

- Strong user profiles including an employee search
- Personalized news feeds and navigation based on profile features
- Multi-language support for international corporations and yet local relevance for all teams in all sites

### Individual Design

Stronger user activation due to adaptations to your corporate design.
